“ The Jindal School of Management is large enough to offer many attractive degree plans but small enough to serve each constituent with the highest level of service and satisfaction. I don't believe there is a “one size fits all” to today's management challenges. Therefore, the Career Management Center works hard to build professional development programs that match each individual student. Our goal is to ensure students emerge as strong candidates for JSOM corporate partners.

For our employers, we strive to provide the most efficient access to highly qualified students insuring that each employer identifies, recruits, and hires the most attractive candidates for their internships and full-time positions. Please contact me to learn more about how to support career education efforts including Mentor Programs, Workshops, and Customized Engagement Opportunities.

Please engage with us and know we are committed to providing you with the best possible service.”
